  - About me
  - About my internship with clevered
  - About app
  - Speech recognition
  - Contact person

# Acknowledgements

- I would like to thank all the people who have helped me with achieving all that I possibly could in this project and getting to understand the use of snap really helped with my project so I thank my parents for signing me in this course and I also give a big thanks to the people of clever who helped make coding easier for me and helping me understand all parts needed for my code.

# About Me..

- Hello everyone my name is James and I am 12 years old, I am in a school named IC in grade 7 and my profession is swimming. I also have a big interest for coding and chess which I consider as a hobby for me

# About My Internship with Clevered..

- I do not have any photographs from the session
- Till now my experience with clever has been outstanding and I have learned many new ideas thanks to the wonderful help of Sonia Rana and Mani Malhotra and I have received a badge for being the rockstar of attentiveness which I am very grateful for.

# Snap..

- Snap really helped with my project since it reminds me of scratch where we add a sprite and a background and it easily allows us to enter our code without any difficulties. It also contains different options such as seeing blocks, listening blocks and speech recognition
- **My app contains speech recognition mainly and whenever I speak something such as pen down then the pen can begin drawing and the use of speech recognition helped out the app a lot.**
- **My app is an interactive artwork with a basketball and in my project several colors are used to draw a certain piece of artwork surrounding the background.**

# Speech recognition

(This will be repeated for each option of the App)

- I was not able to screenshot it
- To use the speech recognition command whenever I want to change the color or ask for pen down then I must use speech recognition. There are no risks while using the option

# Contact Person

- In case I need help with my app I will make sure to contact Mrs. Sonia Rana or Mrs. Mani Malhotra.

**Thank you!**
